

# Try Microsoft System Center For Free

## Microsoft System Center Free Trial

DSS are offering a free trial for either of the following Microsoft System Center Products:

### 1. Microsoft System Center Operations Manager:

#### Who would find this valuable?

- Organisations who currently have no ability to monitor the health of their systems or applications in real time
- Organisations where IT teams in these environments find it difficult to provide a quality service to their users

### 2. Microsoft System Center Configuration Manager:

#### Who would find this valuable?

- Organisations where IT teams spend a lot of time manually imaging and patching PCs and servers. SCCM allows that to be automated freeing up IT to focus on adding value to the business.

#### How does the Free Trial work?

- **For Systems Centre Operations Manager (SCOM)** – DSS will setup monitoring and alerting for the customers most important application eg. mail or a sales system. DSS will show the customer how to monitor application health in real time, how to deal with alerts etc. As an add on service the DSS service desk can take on responsibility for monitoring and notifying the customer of problems for the duration of the trial.
- **For Systems Center Configuration Manager (SCCM)** – DSS will setup automated patch management for a limited number of PCS and servers and will show the customer how to deploy patches using SCCM

#### Next Steps

For more information please contact Rory Cremin, DSS Services Group on 01 603 4336 or e-mail: [rcremin@decision.ie](mailto:rcremin@decision.ie)
